

3 in1 Counter (SMD, Axial & Radial)

New magic parts counter is the most multi-functional components SMART counter system in the NamA Electronics Korea to provide.

"New magic" parts counter is divided into two counters: Manual and Semiautomated type. Magic M is a manual parts counter.

Magic S semi-automatic model is guaranteed to operate automatic function up to 24mm tape. Most of reel tapes are up to 24mm . A standard crank handle is offered to use above 24mm tape such as connector.

"New magic" has all in one system that can count for SMD, Axial & Radial components. Also, the functions are available to count 01005 inch parts by exchanging counting adapter.

It is easy for anyone to be able to control the PCB consists of an individualized of main board, Stepping motor, Interface Port, Keyboard as 32bit control system basis.

The product which PCB designed and produced as SMD module was to improve the quality of the environment by PCB coating for duality.

It has been designed both desk-top and moving path purpose and the counting system can also work when the place is not supported by power.

100~220V 50/60Hz free voltage system makes this machine easier to use in every country without voltage transformer.

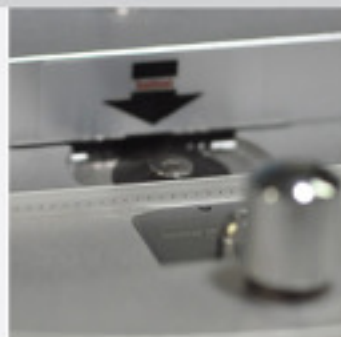

FEATURES

- 3 in 1 Smart SMD Counter (SMD, Axial & Radial)
- **M** Manual type, **S** Semi-motorized type
- 2mm, 4mm~72mm SMD tape Count
- Marking a point on the Axial &Radial tape
- Memo function for counting Q'ty
- Multi Port 2ea x RS-232C, 2ea x USB port
- Barcode Printer or Dot Printer Port
- Barcode Scanner for Preset
- Foot remote control for Motor
- 32bit Micro Controlled
- Easy operating. 6 Multi Function keys
- AC 100~220V (50/60Hz)
- Weight : **M** 7.0 kg, **S** 8.0 kg
- Dimension : 800 x 240 x 130

Key point

3 in 1 Counting system
(SMD, Axial, Radial)

Counting 01005 inch components

Memory for counting Q'ty

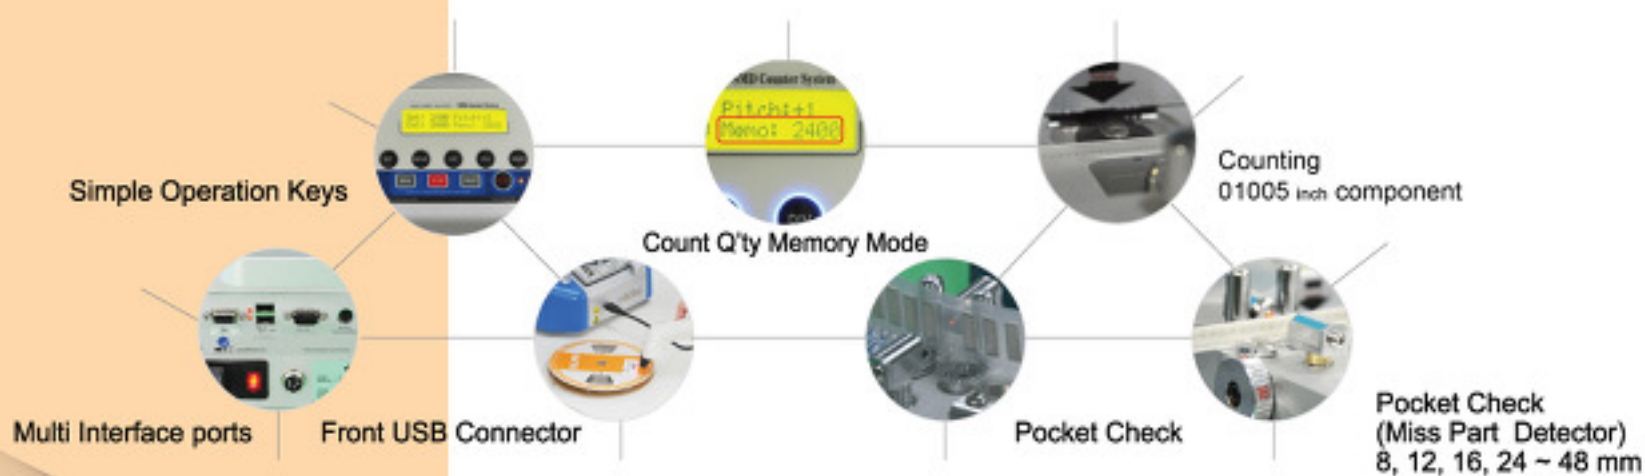

Marking a point
on the Axial, Radial tape

Barcode Printer & Scanner

SMD Parts Counter
